\* WATER RIGHTS NOTES \*

At the time of the recordation of this plat there are no surface water rights appurtenant to those parts of Indian Springs Ranch which lie within Section 36, T41N, R117W; no water from any of the irrigation ditches or streams which pass through said Section 36 may be used on any lot of this subdivision, unless first duly permitted by the State Engineer's Office.

There are no surface water rights appurtenant to any lot of Indian Springs Ranch by virtue of the Spring Creek Ditch (Wilson-Estes) or its two enlargements (Permits 1267, 4929 Ent., and 6518 Ent.). No water may be taken from said Ditch system to water any area within Indian Springs Ranch.

EXCEPT FOR Lots 32, 33, 34, 52, 56, and 58 there are surface water rights attached to all of, or portions of the Indian Springs Ranch lots which lie within Section 31, T41N, R116W.

Said rights are by virtue of one or more of the following ditches:

Permit	Name	Priority	Date
730	The Little Gros Ventre and Spring Creek Ditch	May 28, 1894	
731	Spring Creek Ditch	May 28, 1894	
1052	Mattson Ditch	Sept. 6, 1895

In accordance with Wyoming State Statutes, any appurtenant surface water rights will be abandoned from those portions of road lots 47, 48, and 49 which lie within said Section 31. There will be no change in any other historical use of surface water rights within said Section 31, and all record surface water rights historically exercised will be retained in accordance with Wyoming State Statute. HOWEVER, there are discrepancies between State records and the actual use of water within said Section 31. In order to correct the records certain eliminations, additional abandonments, amendments to and enlargements of existing rights will be required. All required corrections of State records will be carried out in compliance with Wyoming State Statutes.

For a tabulation of water rights appurtenant to any lot of Indian Springs Ranch reference the current records of the State Engineer's Office.

Irrigation water will be diverted and conveyed by means of the existing ditch system within said Section 31, which is shown on this plat. EXCEPT FOR the installation of culverts wherever a ditch crosses a road or a driveway no alteration of said system is required for the foregoing subdivision; no alteration or interference with the historical flow of water to downstream users will result from the foregoing subdivision.

All irrigation ditches and laterals shown on this plat are SUBJECT TO easements to allow for their repair and maintenance; said easements shall satisfy all historical rights, but shall extend away from each ditch on each side for a minimum of fifteen feet (15') from the mean high water line.

The Declaration of Covenants, Conditions, and Restrictions for Indian Springs Ranch impose certain restrictions on flood irrigation on Lots 1-17, 36-41, 53 and 60; refer to Paragraph 4(z) of said Declaration.

Each owner of a lot to which water rights are appurtenant shall be responsible for the means of diversion from said ditch system; the means of diversion being limited to a controlled headgate or pump.

Each owner of a lot to which water rights are appurtenant shall be responsible for their wastewater.
